Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a Market Strategy Director (Emily Johnson)	decide which EV categories and manufacturers to invest in	sales, growth and customer ratings are spread across separate reports	there is no single view that compares segments side by side	uncertain and slow to act on market opportunities
PS-2	a Business Intelligence Manager (David Chen)	track manufacturer market share, battery mix and manufacturing countries	I have to combine data from many spreadsheets by hand	the data is scattered and has no filters or quick drill-down	frustrated and overloaded with manual reporting
PS-3	a Mobility Researcher (Dr. Sarah Williams)	compare battery technologies, driving range and customer satisfaction	I cannot easily see how battery type affects range and ratings	the figures are fragmented, static and hard to visualise	limited and unsure about the conclusions I can draw
