Ideation Phase
Empathize & Discover

Date	31 January 2026
Team ID	
Project Name	EV Market Intelligence Dashboard
Maximum Marks	4 Marks

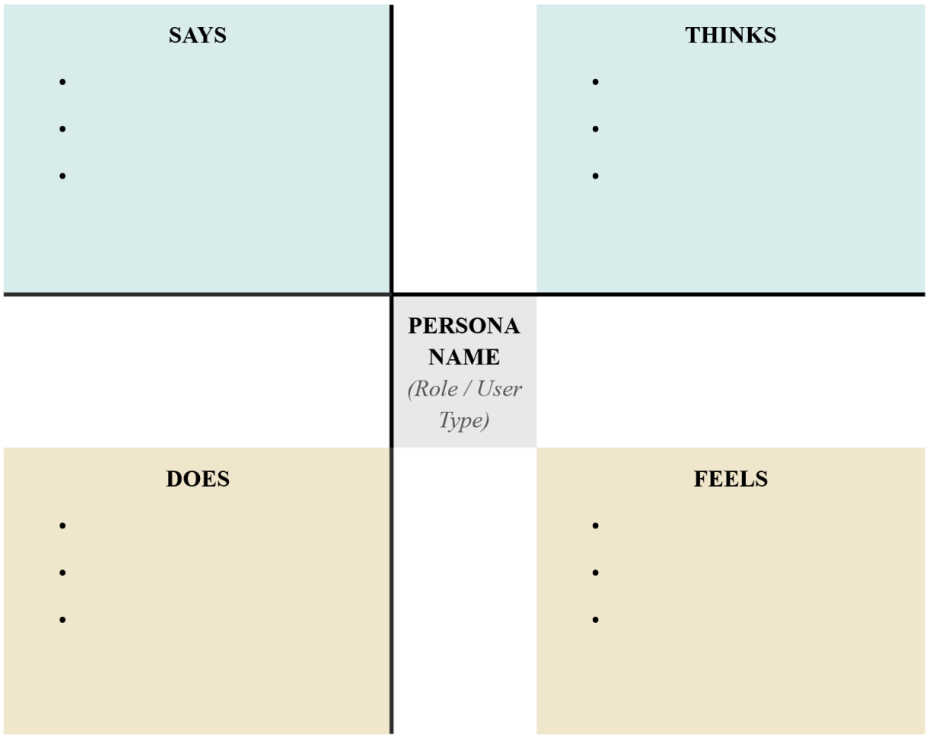

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map – EV Market Intelligence Dashboard:

User group: market decision-makers who rely on EV data – Emily Johnson (Market Strategy Director), David Chen (BI Manager) and Dr. Sarah Williams (Mobility Researcher).

Says	**Thinks**
"Which EV categories are really driving sales?" "Who leads the market and who is gaining share?" "I need numbers I can trust before I present this."	Too much time goes into collecting data instead of analysing it. Battery technology is changing fast and missing a shift is costly. One clear view of sales, range and ratings would speed up decisions.
Does	**Feels**
Pulls sales, battery and range figures from several reports and spreadsheets. Compares manufacturers, categories and countries by hand. Prepares summaries for leadership or research papers.	Frustrated by scattered and inconsistent data. Anxious about missing high-growth segments. Confident when insights are visual and easy to filter.
Pains	**Gains**
Data is split across many sources with no single view. Manual comparison is slow and error-prone. Hard to link battery type with range and customer satisfaction.	One interactive dashboard with persona-based views. Filters by category, battery, country and manufacturer. Instant insights on market share, growth, battery mix and ratings.
