Problem-Solution fit canvas 2.0

Give EV market analysts one interactive view of sales, battery, range and ratings.

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

Who is your customer?
i.e. working parents of 0-5 y.o. kids

- Market Strategy Directors who decide which EV categories to invest in
- BI Managers who track manufacturer share, battery mix and manufacturing countries
- Mobility Researchers who study battery technology, range and customer satisfaction
- Analysts in EV makers, investor and policy teams

6. CUSTOMER CONSTRAINTS — CC

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.

- Data is spread across reports and spreadsheets, and combining it takes time
- Many teams lack the budget or skills for a full BI platform
- Results must be quick and easy to share
- Data quality and coverage differ between sources

5. AVAILABLE SOLUTIONS — AS

Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking

- Excel sheets and static PDF reports: familiar, but manual, not filterable and quickly outdated
- Generic BI tools (Tableau, Power BI): powerful, but need licences, setup and training
- Industry reports and websites: broad overview, not tailored to a role

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

- Find which EV categories and models drive sales
- Compare manufacturers, market share and manufacturing countries
- Understand the battery technology mix and its link to range and ratings
- Spot high-growth segments and compare customer satisfaction
- Get a quick, trusted summary for decisions, reports and meetings

9. PROBLEM ROOT CAUSE — RC

What is the real reason that this problem exists?
What is the back story behind the need to do this job?
i.e. customers have to do it because of the change in regulations.

- EV market data comes from many separate sources and formats
- No single view connects sales, battery, range, rating and country
- The market changes fast, so manual comparison becomes slow and outdated
- Static reports cannot be filtered or drilled into

7. BEHAVIOUR — BE

What does your customer do to address the problem and get the job done?
i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)

- Download and merge data from several reports into spreadsheets
- Build pivot tables and charts by hand for each new question
- Ask colleagues for custom reports
- Present the findings in slides and review meetings
- Indirectly: follow EV news, launches and policy updates

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS — TR

What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.

- A new EV model, policy or battery breakthrough makes data urgent
- Quarterly planning or a leadership review needs a quick market view

4. EMOTIONS: BEFORE / AFTER — EM

How do customers feel when they face a problem or a job and afterwards?
i.e. lost, insecure > confident, in control - use it in your communication strategy & design.

Before: overwhelmed, uncertain and frustrated by scattered data.
After: confident and in control, answering questions in minutes.

10. YOUR SOLUTION — SL

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.
If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.

EV Market Intelligence Dashboard: one interactive web page with persona views (Strategy, BI, Research), filters for category, battery, country and manufacturer, KPI cards, charts for sales, share, battery mix, range, ratings and trend, an auto-generated insight line and a sortable model table.
It fits users because it needs no installation, licence or training, answers each role's questions, and can be updated with real data.

8. CHANNELS of BEHAVIOUR — CH

8.1 ONLINE
What kind of actions do customers take online? Extract online channels from #7

- Search for EV market reports and news
- Download CSV or Excel data and use BI dashboards
- Share links and findings by email and chat

8.2 OFFLINE
What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

- Review meetings and planning sessions
- Printed reports and presentations
- Conferences and industry events
