EV Market Intelligence Dashboard

Project Planning Phase

Date	30 October 2026
Team ID	
Project Name	EV Market Intelligence Dashboard
Maximum Marks	8 Marks

Product Backlog / User Stories

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Dashboard Foundation	USN-1	As a user, I can open the EV Market Intelligence Dashboard and view its title, purpose and navigation tabs.	3	High	To be assigned
Sprint-1	Dashboard Foundation	USN-2	As a user, I can switch between Strategy, Business Intelligence and Research personas.	4	High	To be assigned
Sprint-1	KPI Summary	USN-3	As a user, I can view 2025 sales, year-over-year growth, average range, average rating and model/manufacturer counts.	5	High	To be assigned
Sprint-1	Model Data	USN-4	As a user, I can explore the illustrative dataset of 40 electric-vehicle models and their attributes.	4	High	To be assigned
Sprint-1	Dashboard Foundation	USN-5	As a user, I can view the dashboard in a responsive layout with readable cards and charts.	4	Medium	To be assigned
Sprint-2	Filtering	USN-6	As a user, I can filter EV models by category, battery technology, manufacturing country and manufacturer.	5	High	To be assigned
Sprint-2	Filtering	USN-7	As a user, I can reset all selected filters and return to the complete dataset.	2	High	To be assigned
Sprint-2	Sales Analysis	USN-8	As a Strategy user, I can view sales distribution by EV category.	4	High	To be assigned
Sprint-2	Manufacturer Analysis	USN-9	As a BI user, I can compare manufacturer sales and market share using charts.	4	High	To be assigned
Sprint-2	Battery Analysis	USN-10	As a BI or Research user, I can view the sales share of the battery technologies in the dataset.	5	Medium	To be assigned
Sprint-3	Range Analysis	USN-11	As a Research user, I can compare average driving range across vehicle categories and battery technologies.	4	High	To be assigned
Sprint-3	Customer Ratings	USN-12	As a user, I can compare sales-weighted customer ratings across EV categories.	3	Medium	To be assigned
Sprint-3	Sales Trends	USN-13	As a user, I can view sales trends from 2021 to 2025 for different EV categories.	4	High	To be assigned
Sprint-3	Model Explorer	USN-14	As a user, I can inspect model, maker, country, category, battery, range, price, rating and sales details.	4	High	To be assigned

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-3	Model Explorer	USN-15	As a user, I can sort the model explorer by clicking a column header.	2	Medium	To be assigned
Sprint-3	User Experience	USN-16	As a user, I can view the dashboard using the device's light/dark color preference.	3	Low	To be assigned
Sprint-4	Insights	USN-17	As a user, I can read generated insights about leading category, manufacturer, battery and fastest-growing segment.	4	High	To be assigned
Sprint-4	Country Analysis	USN-18	As a BI or Research user, I can compare sales by manufacturing country.	3	Medium	To be assigned
Sprint-4	Quality Assurance	USN-19	As a team member, I can verify that filters, charts, KPIs and the model table update consistently.	5	High	To be assigned
Sprint-4	Quality Assurance	USN-20	As a team member, I can verify empty-filter results and the no-match message.	2	Medium	To be assigned
Sprint-4	Documentation & Release	USN-21	As a team member, I can document the sample-data limitation and how to replace the dataset.	3	Medium	To be assigned
Sprint-4	Documentation & Release	USN-22	As an evaluator, I can review a completed dashboard demonstration and project documentation.	3	High	To be assigned

Sprint Schedule

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	10 Days	To be confirmed	To be confirmed	Not yet measured	Pending
Sprint-2	20	10 Days	To be confirmed	To be confirmed	Not yet measured	Pending
Sprint-3	20	10 Days	To be confirmed	To be confirmed	Not yet measured	Pending
Sprint-4	20	10 Days	To be confirmed	To be confirmed	Not yet measured	Pending

Project Planning Notes – EV Market Intelligence Dashboard

Project objective: Build an interactive dashboard to explore illustrative electric-vehicle market data through KPIs, filters, charts, role-based views and a sortable model explorer.

Scope note: The current dashboard source describes an illustrative sample of 40 models with approximate figures for demonstration. These are not verified live market figures.

Velocity Calculation

Given team velocity = 20 story points per 10-day sprint.

Average velocity per day (AV) = 20 ÷ 10 = 2 story points per day.

Planned capacity = 20 story points per sprint. The four-sprint backlog is estimated at 80 story points.

Planned Burndown – 20-Point Sprint

The table shows the ideal remaining-work line for a 10-day sprint. Actual daily progress was not provided and must be updated by the team during execution.

Assumptions and Items to Confirm

Sprint Day	Ideal Story Points Remaining	Actual Story Points Remaining
0	20	To be updated
1	18	To be updated
2	16	To be updated
3	14	To be updated
4	12	To be updated
5	10	To be updated
6	8	To be updated
7	6	To be updated
8	4	To be updated
9	2	To be updated
10	0	To be updated

- Team ID and individual team-member names must be confirmed by the project team.
- Sprint start/end dates and actual release dates are pending confirmation.
- The 20-point velocity and 10-day sprint duration follow the example provided in the planning template.
- The dashboard currently uses approximate illustrative data; replace it with an approved dataset before making real market claims.
